DETAILED ACTION

Double Patenting

Claims 1-7,14,17,19-23 are rejected on the ground of nonstatutory double patenting over claims 1-4,12-15,19-23,31-37 U. S. Patent No. 6,715,255 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: a foldable truss member and method of assembling including an elongate member with a side surface, a sawtooth-shaped bridging member having an extension, a plurality of hinges, and a latching member/locking frame disposed between the side members.

Claims 1-7,14-17 are rejected on the ground of nonstatutory double patenting over claims 1-4,17,18 of U. S. Patent No. 6,986,230 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: a foldable truss member including an elongate member with a side surface, a sawtooth-shaped bridging member having an extension, a plurality of hinges, and a latching member disposed between the side members.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,5,21-23 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #3,011,586 to HARVEY, Jr. In reference to claims 1 and 21, HARVEY, Jr. discloses the method of assembling and use of a foldable truss including a plurality of side members (20,30) each including an elongate support (21,22,31,32) having side surfaces, a bridging member (33,34,35), (23,24,25) (45,55) having extensions (26) at opposite ends thereof, a plurality of hinges (36,46,56) and at least one latching member (60). In reference to claim 5, the latching member (60) is fixedly attached to the hinges (see the bottom of figure 2). In reference to claims 22 and 23, the side members (20,30) are rotated to a folded and unfolded position wherein in the unfolded position, the latching members (60) are attached thereto by indentation members (63).

Allowable Subject Matter

Claims 8-13,18 and 24-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
